What is Developmental Language Disorder?

DLD is associated with risk for dyslexia and other learning disabilities.

DLD on average affects about 2 children out of every classroom.

DLD can last a lifetime, but help is available.

DLD is a brain difference that can make talking and listening difficult.

DLD is five times more prevalent than autism.

DLD causes a potential risk for social-emotional behavioural concerns.

Use pictures, objects & actions to help me understand

Teach

new

words

repetitively

Reduce background noise and distractions

Give

me

time

to

think

Speak

slowly

Use

simpler

words

You can access useful videos on DLD here:
